

LIVE MUSIC VIDEO PACKAGES 2009/10

A live video is an essential part of a band or artist's portfolio, but unfortunately a great many are poorly shot or edited, either due to poor equipment or failing to employ professional filmmakers. With the abundance of videos circulating the industry and the world, it is important to make your product stand out from the crowd.

Our Live Event Shoot packages offer filming in High Definition Video, with a minimum of three cameras covering the event, to capture all the action in great picture quality. Our sound engineer tapes up to 16 channels of multi-track audio using either the front of house mixing desk or their own additional equipment and then mixes the audio in their studio. Combine this with the footage and you have a high quality live video with high quality audio to complement it.

Completed edits are provided on DVD, both encoded and data copies, plus uploaded onto YouTube (if required) and our website. Expenses for the project will cover travel costs, tape stock, DVD stock for post-production and anything else required as extra by the shoot.**

To help you fund the project, we offer an instalment payment plan to spread the cost over the life of the project. We can tailor packages to cover different length events - please contact us to discuss having your next gig filmed and to receive a quote if your show isn't covered by our current options :

'UNSIGNED' LIVE SHOOT - £550 + expenses
